

HarmonicDrive®

Flat Hollow Shaft AC Servo Motor

HMA series

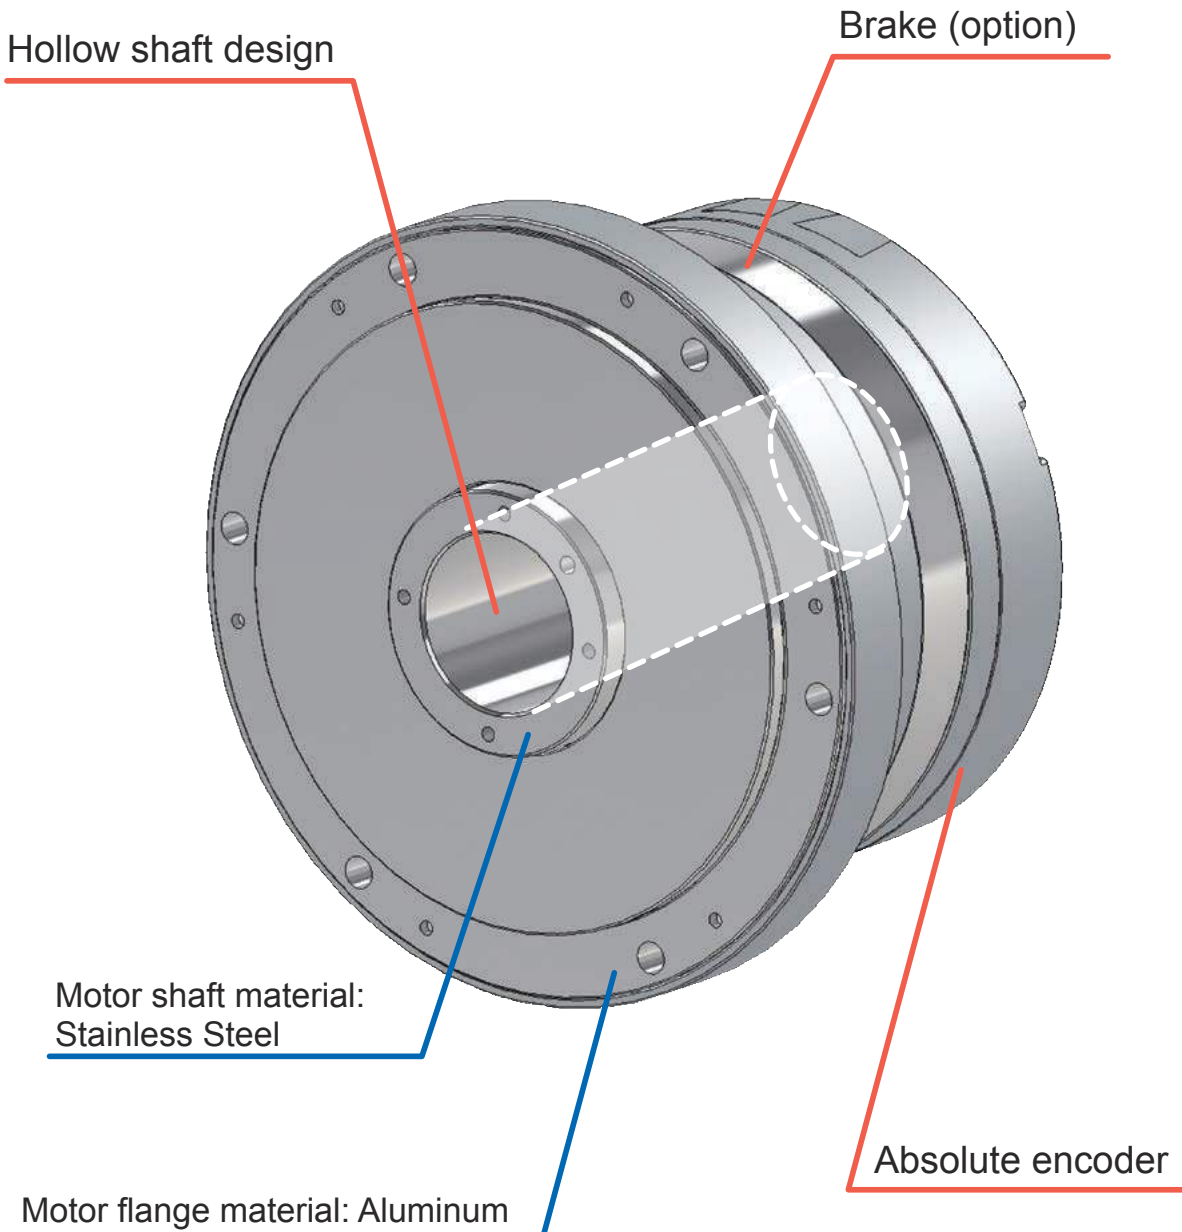

The flat and hollow-shaft AC servo motor has been added to the standard lineup.

Features of our products are compact size, flat shape, and hollow shaft, and the servo motor that has these features has been added to our product lineup as the standard product.

The device configuration containing the hollow shaft reduces the size and cost of the mechanism.

Features

- The hollow shaft design provides the piping/wiring being layout on center of rotation without offsetting the motor.
- The flat structure reduces the size of the device configuration.
- A wide variety of five models with the rated output from 163 to 1320 W has been added to the lineup.
- Integrated brake option is available without dimension change.

Option:

■ Side exiting cable (Symbol for option: Y)

Cables (motor cable and encoder cable) are exited from the side of the motor. Use this option when there is not enough space in the rear direction of housing when installing a motor in the device.

For size 08, contact us separately. Size 21A is not compatible.

The values in the table above show typical values.

*1: They are typical characteristics in the case of combinations with our driver (driven with the ideal sine wave).

*2: This is the value for saturated temperature when installed on the next aluminum heatsink of the following size:

HMAC08: 320 x 320 x 16 [mm], HMAB09: 350 x 350 x 18 [mm], HMAB12: 400 x 400 x 20 [mm], HMAB15: 500 x 500 x 25 [mm], HMAA21A: 650 x 650 x 30 [mm]

*3: This is the value of the phase EMF constant multiplied by 3.

*4: The range of the multi revolution counter is from -32768 to 32767.
